# Latest Technologies Of Google

- Robot Calling Human
- Gmail Will Write Emails
- A New AI Chip
- Maps Gets an AR Upgrade
- AI-Powered Pic Sharing
- A New News App
- Robot Manners
- Tackling Tech Addiction

# Robot Calling Human

- It is part of the Google Assistant
- It competes with Amazon's Alexa and Apple's Siri.
- A demonstration on stage showed Google's Assistant calling small businesses to book appointments.
- the software discussed different times, the number of seats and other details with the unsuspecting employee.

# Gmail Will Write Emails

- Google has been developing machine learning, computer vision, natural language
- This technology predicts the next words or phrases as people type an email.
- It takes Gmail a step further beyond Smart Replies

# A New AI Chip

- Google introduced version 3.0 of its Tensor Processor Unit.
- a chipset designed in-house for handling all these data-heavy AI tasks.

Digital

- The new version of a New AI Chip is eight times more powerful than last year
- it is water-cooled rather than air-cooled.

# Maps Gets an AR Upgrade

- The company introduced a Visual Positioning System
- It's not always clear which way to walk initially.
- The Maps application also got some functionality similar to Apple Maps
- The feature tackles a common problem when using Google Maps for walking directions
- users will be able to raise their phones and see an image of the street with a large arrow pointing the correct way.

# AI-Powered Pic Sharing

- Google announced big upgrades to its Photos app.
- including the ability for AI algorithms to suggest who to share shots with based on who is in the picture.
- The system will also make editing suggestions
- Also The system turns black and white photos to color.

# A New News App

- Google praised the importance of journalism and announced a new Google News app
- It comes with a built-in subscriptions tool making it easier for readers to pay for digital magazines and newspapers.
- It looks like the Google version of the Apple News service

# Robot Manners

- Google said it will begin encouraging children to say please to the Google Assistant, to encourage better manners
- Amazon announced similar functionality for Alexa.

# Tackling Tech Addiction

- Many tech companies are looking to free people from their devices, but Google is one of the first to show off tools.
- The company announced a new Dashboard tool for Android phones
- Apple plans to show off similar functions when it announces a new version of its iOS mobile operating system

THANK YOU
